

Partner Patch Program Requirements: SENIORS & AMBASSADORS

BACKGROUND

What are the things that we do in our everyday life where we live that keep us and others safe? Think about the different seasons, and name a unique thing you might do for each time of the year. Discuss with each other ways our community works together to keep each other safe.

Spring 	
Summer 	
Fall 	
Winter 	

GET INVOLVED

1. Participate in an event in your community that is all about safety, and helps prevent injuries! Consider partnering with an organization in your community like libraries, schools, fire houses, youth organizations, retail stores.
2. Use digital media to promote your safety efforts and spread awareness. Utilize a personal page or school page. Tag local organizations that are involved in injury prevention like Stony Brook Children's! @stonybrookkids

CHAT ABOUT IT

Talk with your fellow Girl Scouts. How did it feel to make a difference in our community by preventing injuries and promoting safety? Do you ever see yourself doing something in the future that would make a lasting impact on safety?

Next, Come up with a plan on how you would organize and participate in your own safety event in the community.

1. What is a safety topic that you feel is important to address in your community?

2. How would you organize your event? Who could you partner with to help you?

3. What challenges do you think you might face along the way?

4. How would planning your own event help you grow as a Girl Scout and member of the community?

About Stony Brook Children's

Stony Brook Children's offers the most advanced pediatric specialty care in the region. That means that the smallest babies, the sickest children, and the most complex pediatric traumas all get sent to Stony Brook Children's.

With more than 180 pediatric physicians available in over 30 pediatric specialties, we offer a full range of medical services to support the physical, emotional and mental development of infants, children and young adults. We also can provide leading-edge care for just about every diagnosis — from a simple fracture to a kidney transplant. And as an academic medical center actively engaged in research, we offer families access to groundbreaking, and often lifesaving, clinical trials for their children. We invite you to learn more about the exceptional care Stony Brook Children's provides for children and families on Long Island.
